

Please make the following changes:

IN THE SPECIFICATION

Delete pages 26-33 of the existing Sequences Listing and insert in their place the substitute Sequence Listing on separate pages 26-32, attached hereto, and renumber pages following page 32.

REMARKS

This paper is submitted in response to a Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures in connection with parent application 08/807,864. A copy of the notice accompanies this submission.

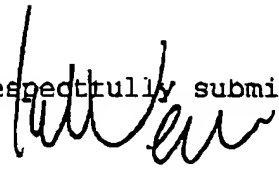

A substitute computer readable form (CRF) copy and a substitute paper copy of the "Sequence Listing" are submitted herewith. A verified statement of James A. Coburn, preparer of this Sequence Listing indicates that the CRF copy and the paper copy are the same.

The substitute copies are the same as the Sequence Listing in the application as filed except that the General Information section (1) has been revised to disclose applicable information in compliance with the Sequence Listing rules 37 C.F.R. §§1.821-1.825. Additionally, a previously erroneous sequence description for SEQ ID NO:19 has been corrected to accurately represent the disclosure on specification page 20, line 1. Hence, no new matter has been added.

Applicants respectfully submit that upon entry of the foregoing amendments, the Sequence Listing will conform to the

applicable rules. In view that the application is in condition for examination, prompt and favorable action on the application is earnestly solicited.

Respectfully submitted,

GERARD J. WEISER
